

## **Welcome To Firefly Lodge**

There are few areas of land like Firefly Lodge left in Zambia; with our remote and pristine bush, far removed from air, light and noise pollution. The land reminds guests of a mixture of Out of Africa, The Lion King and Daktari with a blend of unique and exotic scenery only found at Firefly Lodge Zambia, because of this, the relaxing, healing, re-energizing and destressing qualities at Firefly are fantastic.

This connection with nature and the disconnection from the modern world - is what sets us apart and makes so that we are not a typical "Tourist Lodge"!

When here, we ask that you leave some of the comforts of home behind and embrace a more back-to-nature, slower, slightly more rustic lifestyle that embraces our surroundings, our reality, and our dynamics. Guests with an open mind and an evolving and adaptive perspective, of where they are in the world, along with an openness to distinct cultures, foods, and languages, do very well at Firefly.

Guests that are best able to successfully leave the comforts of modern city life behind and embrace more rustic, wilderness living, realizing the differences between the two, and understanding the difficulties in matching modern, first-world comfort, technology, and dynamics when in such remote settings tend to thrive and thoroughly enjoy the Lodge.
